Thermal P90

Version: 2.4

Reviewed on 05.01.2021 Print date: 05.01.21

# SECTION 1. Identification of the substance/mixture and of the company

**Product identifier** 

Name Used on Label : **Thermal P90**Order-No. ( 5 Liter) : 8891415
Order-No. ( 10 Liter) : 8891414
Order-No. ( 55 Gal Drum): 8891307

Company : JULABO U.S.A., INC Manufactured for: 884 Marcon Blvd

ALLENTOWN, PA 18109 / U.S.A.

Phone : [+1] 610-231-0250
Fax : [+1] 610-231-0260
E-mail : info@julabo.us
Internet : www.julabo.us

Emergency Information :CHEMTREC 1-800-424-9300

Trade name :Polydimethylsiloxane

Recommended use : JULABO PRESTO® Highly Dynamic Temperature Control Systems Only

Application : temperature control liquid

: PRESTO® working temperature range: -90 °C - +170 °C

## **SECTION 2. Hazards identification**

**GHS Classification** 

Flammable liquids Category 4

**GHS Label Element** 

Signal Word Warning

Hazard Statements H227 Combustible liquid

Precautionary Statements Prevention

P210 Keep away from heat/sparks/open flames/hot surfaces.

No smoking

P280 Wear protective gloves/eye protection/face protection

Storage

P403+P235 Store in a well-ventilated place. Keep cool

Disposal

P501 Dispose of contents/container to an approved waste disposal

Facility.

HMIS Ratings: Health: 0 Flammability: 2 Physical hazard: 0

# **SECTION 3. Composition / information on ingredients**

Substances

Substances/Mixture Mixture Chemical nature Silicone

Chemical Name	CAS number	%
Dodecamethylpentasiloxane	141-63-9	60-100

Any concentration range shown to protect confidentiality or due to batch variation.

**Dangerous components** Not applicable

### **SECTION 4. First aid measures**

Description of first aid measures

JULABO USA, Inc. www.julabo.us Page 1 of 7

Thermal P90

Version: 2.4
Reviewed on 05.01.2021 Print date: 05.01.21

General information: No special measures required

**Inhalation** Supply fresh air; consult doctor in case of complaints.

**Skin contact** Wash skin with soap and water; consult doctor if symptoms occur.

Eye contact Rinse immediately with plenty of water for at least 15 minutes. Get medical

attention if irritation develops and persists.

**Ingestion** Rinse mouth. DO NOT induce vomiting. Get medical attention immediately.

Most important symptoms/effects, acute and delayedNone knownProtection of first-aidersBNo special precautions are necessary for first aid responders.Indication of immediate medical attention and special treatment neededTreat symptomatically.

# **SECTION 5. Firefighting measures**

**Flash point:** 167 °F / 75 °C (Closed Cup)

**Boiling point:** 442 °F / 229 °C **Autoignition temperature:** 430 °C

Flammability Limits in Air: Not determined

**Suitable extinguishing media** Dry foam, alcohol-resistant foam. Carbon dioxide (CO<sub>2</sub>), water.

Unsuitable extinguishing media Water with full jet.

Specific hazards arising from

the chemical

Do not use a solid water stream as it may scatter and spread fire.

Flash back possible over considerable distance. Vapors may form explosive mixture with air. Fire burns more vigorously than would be expected. Exposure to combustion products may be a hazard to health.

Special protective equipment and precautions for firefighters

Firefighters must use standard protective equipment including flame retardant coat, helmet, gloves, rubber boots, and self-contained breathing apparatus.

Fire-fighting equipment /

**Instructions** 

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Cool containers/tanks with water spray. Remove

containers from fire area if it is safe to do so. Evacuate area.

### **SECTION 6. Accidental release measures**

### Personal precautions, protective equipment and emergency procedures

Wear appropriate personal protective equipment. Particular danger of slipping on leaked / spilled product. Remove all ignition sources.

### **Environmental precautions**

Do not allow product to reach sewage system or any water course. Prevent further leakage or spillage if safe to do so. Prevent spreading over a wide area. Retain and dispose of contaminated wash water. Local authorities should be advised if significant spillages cannot be contained.

### Methods and material for containment and cleaning up

Non-sparking tools should be used. Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). For large spills, provide diking or other appropriate containment to keep material from spreading. If diked material can be pumped, store recovered material in appropriate container. Clean up remaining materials from spill with suitable absorbent.

Suppress gases/vapors/mists with a water spray jet.

Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which regulations are applicable. Sections 13 and 15 of this SDS provide information regarding certain local or national requirements.

# **SECTION 7. Handling and storage**

### Technical measures

See engineering measures under EXPOSURE CONTROLS/PERSONAL PROTECTION section.

#### **Local/Total ventilation**

Use with local exhaust ventilation. Use only in an area equipped with explosion proof exhaust ventilation.

#### Conditions for safe storage, including any incompatibilities

JULABO USA, Inc. www.julabo.us Page 2 of 7

# Safety Data Sheet / Product Details Thermal P90

Version: 2.4

Reviewed on 05.01.2021 Print date: 05.01.21

Store in a cool, dry place out of direct sunlight. Keep in original, properly labeled container. Keep away from heat and sources of ignition.

### Advice on safe handling

Handle in accordance with good industrial hygiene and safety practices. Keep container tightly closed. Keep away from heat and sources of ignition. Take precautionary measures against static discharges. Take care to prevent spills, waste and minimize release to the environment.

#### Materials to avoid

Do not store with the following product types: strong oxidizing agents, explosives, gases.

### **SECTION 8. Exposure controls / personal protection**

Occupational exposure limits No exposure limits noted for ingredient(s).

**Biological limit values**No biological exposure limits noted for the ingredient(s).

**Appropriate engineering controls** Provide eyewash station

Engineering measures Processing may form hazardous compounds (Section 10)
Ensure adequate ventilation, especially in confined areas

Use only in an area equipped with explosion proof exhaust ventilation.

#### Individual protection measures, such as personal protective equipment

Eye/face protection Use proper protection – safety glasses as a minimum

**Skin protection** 

**Hand protection** Wear flame retardant protective gloves

Other Wear flame retardant antistatic protective clothing. Skin contact must

be avoided by using impervious protective clothing (gloves, aprons,

boots, etc.)

**Respiratory protection** General and local exhaust ventilation is recommended to maintain

vapor exposures below recommended limits. Where concentrations

are above recommended limits or are unknown, appropriate

respiratory protection should be worn. Follow OSHA respirator

regulations (29 CFR 1910.134) and NIOSH/MSHA approved respirators. Protection provided by air purifying respirators against

exposure to any hazardous chemical is limited. Use a positive pressure air supplied respirator if there is any potential for

uncontrolled release, exposure levels are unknown, or any other circumstance where air purifying respirators may not provide

adequate protection.

Thermal hazards Not available

#### General hygiene considerations

Wash hands before breaks and immediately after handling product. Handle in accordance with good industrial hygiene and safety practice. This product can generate formaldehyde at approximately 150 °C (300 °F) and above in the presence of air. Formaldehyde is a skin and respiratory sensitizer, eye and throat irritant, acute toxicant and potential cancer hazard. Safe handling conditions may be maintained by keeping vapor concentrations within the OSHA Permissible Exposure Limit for formaldehyde.

# **SECTION 10. Stability and reactivity**

Product stable and non-reactive under normal conditions of use, Reactivity

storage and transport. Not a reactive hazard.

Chemical stability Stable at normal conditions

Possibility of hazardous reactions Hazardous polymerization does not occur. Combustible liquid. Vapors

may form explosive mixture with air. Can react with strong oxidizing agents. When heated to temperatures above 150 °C (300 °F) in the presence of air, trace quantities of formaldehyde may be released. Adequate ventilation is required. See OSHS formaldehyde standard

29 CFR 1910.1048 Heat, flames, sparks.

Conditions to avoid **Incompatible materials** Strong oxidizing agents

Hazardous decomposition products Hazardous decomposition products will be formed at elevated

Temperatures.

# **SECTION 11. Toxicological information**

Information on likely routes of exposure

Not available Ingestion Inhalation Not available Skin contact Not available

Eve contact Contact of the product with the human eye may result in a harmless

and reversible clouding of sight which is of short duration, caused by

formation of an oil film on the cornea.

### Symptoms related to the physical, chemical and toxicological characteristics

Information on toxicological effects

Acute oral toxicity LD50 (rat): >2,000 mg/kg

No acute oral toxicity based on data from similar results.

Acute dermal toxicity LD50 (rabbit): >2,000 mg/kg

No acute dermal toxicity based on data from similar results.

Skin corrosion / irritation Not classified based on available information.

Species Rabbit

Result No skin irritation

Remarks Based on data from similar results

Serious eye damage / eye irritation Not classified based on available information.

**Further information** This material contains dodecamethylcyclohexasiloxane (D6). D6 was administered to rats by whole body inhalation to 0, 1, 10 and 30 ppm for a period of 13-14 weeks. An increased incidence and severity of inflammation and hyperplasia was observed in the nasal region in the 10 and 30 ppm dose groups. These observations are consistent with a mucosal irritant, however there was little or incomplete recovery after the 28-day recovery period. The relevance of these findings to humans is unknown.

## **SECTION 13. Disposal considerations**

**Disposal methods** Follow applicable Federal, State and Local regulations

Resource Conservation and This product has been evaluated for RCRA characteristics and does not meet

Recovery Act(RCRA) the criteria of hazardous waste if discarded in its purchased form.

Waste from residues Dispose of in accordance with local regulations

Contaminated packaging Dispose of as unused product. Empty containers should be taken to an

Approved waste handling site for recycling or disposal. Do not burn or use

cutting torch on the empty drum.

Listed on the AICS (Australian Inventory of Chemical Substances)

### **SECTION 16. Other information**

This document was created on 5 May 2015.

**NFPA ratings** Health: 0 – Exposure under fire conditions would offer no hazard beyond that

of ordinary combustible materials.

Flammability: 2 – Must be moderately heated or exposed to relatively high ambient

temperature before ignition can occur and multiple finely divided suspended solids that do not require heating before

ignition can occur.

Instability: 0 - Normally stable, even under fire exposure conditions, and not

reactive with water.
