

Environmentally-Friendly Cooling

NEW Recirculating Chillers & Immersion Coolers

VALEGRO recirculating chillers and IC immersion coolers deliver precise, energy-efficient cooling with natural refrigerants, reducing energy costs and environmental impact without compromising performance.

VALEGRO Recirculating Chillers

VALEGRO recirculating chillers combine precise temperature control with a compact footprint and low Global Warming Impact refrigerants. The user-friendly design features an intuitive OLED touch display, ergonomic controls, an adjustable pump, and multiple connectivity options, ensuring dependable cooling and easy operation.

VALEGRO Recirculating Chillers

VALEGRO Models	Temperature Range	Cooling Capacity at 20 °C	Communication Interfaces	Natural Refrigerant
VALEGRO 350	-20 °C to 40 °C	350 Watts	USB-C & RS232 Ethernet Optional	R290
VALEGRO 500	-20 °C to 40 °C	500 Watts	USB-C & RS232 Ethernet Optional	R290

IC Immersion Coolers

IC immersion coolers deliver rapid liquid cooling and efficient counter-cooling without wasting tap water or relying on dry ice. This sustainable alternative runs on natural refrigerants and features magnetic probe holders, making operation simple and efficient. The IC50E adds precise control with a bright OLED display, USB-C connectivity, and an external Pt100 sensor input.

IC Immersion Coolers

IC Immersion Coolers	Temperature Range	Cooling Capacity at 20 °C	Communication Interfaces	Natural Refrigerant
IC40	-40 °C to 40 °C	250 Watts	-	R290
IC50	-50 °C to 40 °C	450 Watts	-	R1270
IC50E	-50 °C to 40 °C	450 Watts	USB-C External Pt100 sensor	R1270
