

Accelerate Your Automotive R&D

JULABO temperature control units provide the precision and reliability you need to research, develop, and test fuel-efficient, low emissions vehicles, and state-of-the-art components for consumer and fleet vehicles.

Fast Accurate Temperature Control

- ▶ Scientific & Industrial research, testing, innovation & production
- ▶ Reactor vessels
- ▶ Material & component testing
- ▶ Environmental temperature simulations
- ▶ Applications requiring a broad range of temperatures -90°C to +250°C
- ▶ Those looking to quickly compensate for external thermal events (endothermic & exothermic reactions)

Research, Development & Testing Applications

- ▶ Environmental temperature simulations
- ▶ Numerous chamber tests for parts, components & materials
- ▶ DC/AC converters/inverters
- ▶ Electric & hybrid motors
- ▶ Wireless charging systems
- ▶ Clean diesel injection systems
- ▶ Gearbox/bearing tests
- ▶ Lifetime tests for batteries
- ▶ Solar technologies
- ▶ Airbag tests

Personalized Product Recommendations & Solutions

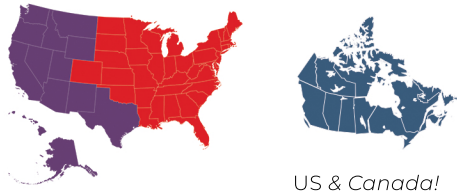

Our PRESTO temperature control systems, SC (Semichill) recirculating Chillers, & FP ultra-low refrigerated circulators are used throughout the automotive industry. We also offer customized options for your specific needs.

Talk to your account manager and get a personalized recommendation.

Support When and How You Need It

SERVICE COVERAGE

Get a service pro to your facility quickly. With 10+ technicians available through our headquarters and service partners, we've got your service needs covered.

CHAT

Chat directly with a service technician through our website. We'll answer your questions and resolve your issues quickly.

DIAGNOSTICS & TROUBLESHOOTING

Many of our units allow you to send data directly from your unit to our service team using our USB ports or black box diagnostics.

SERVICE & SUPPORT

Monday–Friday 8:30am–5pm EST
service@julabo.us – 610-231-0250

EXTENDED HOURS

Monday–Friday 5pm–8pm EST – 610-737-5726 (call or text)

WEEKEND HOURS

Saturday: 12pm - 5pm EST
Sunday: No Extended Service Available.
610-737-5726 (call or text)

Cover your JULABO for up to six years with our JULABO Shield preventive maintenance plans. Leave the maintenance, service, and calibrations to us, and extend your coverage beyond the 2-year standard warranty.

Connect face-to-face with our service experts for quick installations, service calls, and user training.

Our JULABO Crystal fluid test is a quick, affordable way to check the health of your fluid and your unit. It detects potential problems, including deteriorating parts, corrosion, and expired fluids, before they lead to downtimes.

Enroll in our online classes and get all the information and tutorials you need to master the science of temperature control. JULABO University provides specific information about our circulators, chillers, and temperature control equipment, including how to maintain, install, and operate them for greater efficiency.
